

# ***Motion Control:*** General Products & Services

**ABTech** provides ***superior motion control*** performance, designed for your application !

ABTech, Inc. is a complete motion systems solution provider. We integrate our Ultra-precision air bearing and mechanical bearing stages with state-of-the-art motion control products available on the market today.

Whether we provide a custom built control package or integrate standard components alone, ABTech delivers superior motion control performance featuring:

- Galil DMC -20XX Series Motion Controllers
- Copley 7228 DSP Brushless PWM servo amplifier and,
- Heidenhain and Renishaw encoders and readheads

Many other Controller/Amplifier (Linear or PWM) / Encoder (Digital or Analog) combinations are available to meet your specific motion requirements. Micro and Nano-Step Motor systems for linear and rotary motion are also available. Price/performance structure to meet your budgetary requirements.

User interfaces range from Interactive Touch Screen control of your machine to a simple Start/Stop/Jog/Display control box.
